

PREMIUM ROAD MARKING PAINT

Premium Road Marking Paint is a ready to use water based high performance system formulated to meet the requirement of AS 4049.3. It is long lasting and suitable for application on Asphalt, Spray Seal, concrete roads, pathways and car parks.

Physical Characteristics

Colour:	white or coloured viscous liquid
Viscosity:	4.7 – 5.2 poise (at manufacture)
Density:	1.66 Kg/Ltr
Solids:	Approximately 77% by weight

Technical Features

- Water based high performance system.
- Quick drying no-pick-up time less than 25 minutes
- Wet film thickness of 300 to 400microns, when used with Type B (drop on) glass beads.
- Wet film thickness of the applied paint must be not less than 500microns when used with Type D (large wet weather) glass beads.
- In order to promote good drying, the wet film should not exceed 600 microns.
